

## Testimonials

Airdrie Family Wellness would like to share with you some of the fascinating stories of care that our like family members (patients) have given. A special thank you to all those who have taken the time to share their experience with us and others!

Barb says "I first meet Dr. Rebecca about 4 years ago. I have been under Chiropractic care for the last 30 years due to an injury I sustained as a child. I have had good results with other Chiropractors but [Dr. Rebecca](#) got more release in my hip then I have had since I broke my femur when I was 11. I have recommended Dr. Rebecca to several people and most have reported having positive results from her treatments. All comment on her friendly and informative style; if there is something that isn't clear or that you don't understand she always takes the time to explain what is going on to the best of her ability. I would recommend anyone looking for excellent Chiropractic care to give Dr. Rebecca a [call](#). Her staff is also very knowledgeable and friendly.

Gabe & El explain "Our first trip to the chiropractor was life-changing (we had no idea our spines were supposed to move like they do now), and we have regularly visited Dr. Rebecca since. She has watched our girls grow and established trusting relationships with both of them, ensuring their care experiences are always positive. When our oldest had concerns with one leg Rebecca was thorough, making sure she took her as far as possible with treatment and exercises before fitting her for orthotics. Gabe has not had back spasms (which used to guarantee at least one trip a year to urgent care) since beginning to see Rebecca, and I have had huge relief from my scoliosis. Rebecca continues to care for our family monthly, and always provides effective follow-up exercises; we recommend her to anyone."

Daniel tells "I was not a believer of chiropractic but after meeting Dr. Marcucci she not only educated me on the fundamentals of it but also the versatility of it. She was able to help me with what is called [Active Release Technique](#). This helped me with my competitive swimming in terms of range of motion and flexibility. I just move a lot better now after seeing her. Thank you Dr. M!

Byron proclaims “Living with severe pain in my lower back and upper legs for the past seven years, I had used prescription drugs to target inflammation and pain, massage therapy, adjusted and focussed my fitness routine and underwent cortisone injection treatments in my intervertebral discs. Not completely trusting the more holistic approach to finding relief, my last resort was to seek the assistance of a Chiropractor. I met Dr. Marcucci about three years ago and really lucked out! Believing that trust is a major component of any physician/patient relationship, I quickly gained confidence in Dr. Marcucci’s knowledge and ability. She listened to my concerns and assessed my physical symptoms to ensure consistency in her diagnosis. Dr. Marcucci then provided the treatment necessary to begin correcting those problems. Additionally, the techniques Dr. Marcucci used were within my comfort level and she also provided me with unique and dynamic exercises that I could routinely do in conjunction with her treatments.

Through her skills and expertise, Dr. Marcucci has helped me find relief from my chronic pain and because of this, I can now enjoy even the little things in life that used to be hindered by a poor range of motion and severe pain”

Jennifer asserts “prior to chiropractic, I suffered low back pain, neck pain, painful sinus pressure, headaches and acne. Dr. Marcucci has been extremely helpful in helping me understand why I am suffering from these pains and has been extremely successful at making me feel SO much better. She truly cares and wants to make you feel your best. I feel very lucky to have found Dr. Marcucci!

Jared enunciates “our youngest daughter was having difficulty sleeping and always [catching colds](#) resulting in a runny nose. After seeing Dr. Rebecca and being regularly adjusted, she sleeps so much better and the frequency of being ill has been reduced substantially.

Lisa & Greg illuminate “we were referred to Dr. Rebecca Marcucci by a family friend and are so happy we had the opportunity to see her. Dr. Marcucci sees our whole family for preventative care or acute injuries. We’ve experienced significant benefits with back pain, shoulder pain and spine correction. We’re so grateful for the care and attention we get from Dr. Marcucci and the [Airdrie Family Wellness team!](#)
